56. the government now taxing mine mills not operating. The mining companies can't afford to pay the taxes on dormant buildings on their properties. They are now starting to tear down the offices and other buildings on the mine properties to avoid this tax that is too high with no money in the treasury. I would like to see the government lift this tax. To leave the mine buildings sitting there for future use

60. I think the government should give the mines of Cobalt, a cobalt contract to stock pile Cobalt for the government to stock pile for future use. This would and should employ approximately 300 men. In the early 50's, the government gave Silver Miller and Cobalt Consolidated mines Cobalt contracts for 5,000,000,00 lbs. of Cobalt. There is no reason why they can't do that again. The companies didn't make any money out of it. but it did employ men and we found silver.
