10. I like it here is a nice quiet community to live in

11. I think education is adequate. There is not really any economic situation when wages are raised so is the produce. We have the mining school here but not many local boys take advantage of this. Also the hospital trains girls for RNA. We need a dental clinic also a Doctor, shopping centre, bank everything you go to do has to be done out of Town all we have here is Post Office. This means if you can not drive you have to hire a taxi or go by bus. Arney construction

James Lathem. I think we should use our own park instead of Haileybury's. In North Cobalt there is nothing we should have more here so our children would not have to travel up there. In this day and age everyone should have water and sewers here. Would like to see paved roads and good sidewalks more lighting more housing for Senior citizens as these things are necessities. This should be done by Government grants to our council.
