4. 679-8787
5. Housewife
6. I was born in St. Thomas . Ontario
7. My parents were born in Tilbury, Ontario
8. Married
9. 30 years old

10. its a nice place to live but everything is expensive. I think that children should be kept in town at least until grade 9, town owned facilities such as library and gymnasium provided for after school so children can take advantage of it on weekends also. Grade 13 should be in the same school as grades 9 to 12 wherever it may be. Children should not have to travel more than 70 miles return to go to school. The economic situation in Cobalt right now is very low and we really need something and the government should help. Job opportunities for women are very rare. As for the men there's still a high 'rate of unemployment. About the only training that's available is in the mining industry, as a miner. Wages aren't too bad, but the cost of living makes them seem less. An art centre would be nice but the sports field , it should come first. The high rentals are causing the small shops from starting up, for example craft shops, specialty shops as well as the big bargain type variety stores. Recreation in Cobalt is not too bad as far as arena or baseball and bowling but there is a lack of organization to keep. it going properly .

Complete recreational face lift is needed, parking facilities are needed, animal central is needed and a good paint job on some buildings is needed. We should have a local police force for Cobalt alone.

The new library was definitely a good change even though prices are still high the new Red & White store is larger and able to keep more stock of specials. Lang St. is shaping up a bit.

We've got a doctor but he is over his head in work and therefore we should have at least one more doctor, we should also have our own animal control officer and new by-laws for things such as snowmobile like those who race through the town and bicycle by-laws for a start and the by-law officer should have full authority.

These changes could be brought about with a high percentage of cooperation between the municipality and town authorities.
